Add LLM key

Welcome to xvn.

Setup agent · Online

Hi! I'm the xvn setup agent. I'll help you build or pick an AI trading bot. What's your goal today?

I want to mean-revert ETH on the 15-minute timeframe. Skip chop.

Good shape. I'll start from the `mean_reversion` template and wire a chop-aware regime classifier.

Tool: list_templates
Found 7 templates. Selected: mean_reversion ✓

I'm drafting `eth-mr-v3`. Want to keep RSI < 30 as the entry trigger, or use Bollinger band touches?

Both — and let the LLM decide which is stronger.

MODEL

anthropic/claude-haiku-4-5

SYSTEM PROMPT

Intern – pre-trade analyst
You are an intern reviewing a candidate trade.
Given OHLCV + indicators + regime, return JSON:
action: "long" | "short" | "skip"
conviction: 0.0–1.0
reasoning: <= 2 sentences

Bias: mean-reverts on RSI < 30 with bb_lower touch.
Skip when: ATR-multiple > 3 or regime = chop.
